The VaDia 2

- Logging and analyzing milking vacuum
- VaDia Suite PC Program and mobile app for data analysis and report making
- Universal and multi-purpose - works on all brands of milking equipment

Advantages of VaDia 2

- Always ready to use - not necessary to initialize before measurements
- New housing - full water resistant
- More accurate and stable digital vacuum sensors
- Smart activation by movement
- Improved battery management - up to 16h of logging
- Marginal battery discharge during sleep
- Cluster attachment strap
- Small, lightweight 'shell-curved'
- 4 vacuum channels, indicator light and watertight USB
- PC program compatible with Vadia1 and Vadia2
- 4GB flash memory visible via USB like flash drive
- Available in two colors (blue and green)

Mobile app and PC program

- User Interface adapted for touch screens
- Automatic updates when you start up the PC program.
- Comprehensive customer database and results from previous tests.
- Available in many languages, including Asian languages.
